

3M ESPE

Present an Educational Productivity Seminar

Materials and Techniques to Promote Dental Practice Success In

Impressioning

This program will discuss the importance of the impression procedures and offer practical solutions utilizing advanced materials and techniques. Through discussion individuals will review the latest materials as well as learn to:

- ✓ **Improve techniques**
- ✓ **Troubleshoot impressions**
- ✓ **Gain confidence in esthetic results**
- ✓ **Reduce chair time**
- ✓ **Increase patient satisfaction**
- ✓ **Closed and open tray techniques (brought to you by Zimmer)**

Special Guest Speaker – (Mack) Marcelino Salviejo-Rivas; is a Certified Dental Technician (CDT), with a specialty in Ceramics. He received his Prosthetic Laboratory Training at the United States Navy Dental Technician School, San Diego, CA; in 1966. After his military service he came to the University of California, Los Angeles (UCLA) School of Dentistry, as a Clinical Prosthetic Technician (Staff Research Associate), working with the associate professors, student dentist, faculty private practice, and Maxillo-facial prosthetic areas for sixteen years before joining Unitek in 1984 (3M Unitek), Monrovia, California, as a Laboratory Prosthetic Training Instructor until 1989. From 1995 until the present, has been assigned to Dental Products Lab (3M ESPE) Technical Services group, and has had product responsibilities for Laboratory and Digital Products, which include Sinfony, Rocatec, MZ100 for CEREC, and Lava. He has worked chair-side, in the laboratory, and has experience in all phases of prosthetics.
